MM1	16		<p><u>Whilst the Council will continue to deliver growth through this Local Plan, in terms of flexibility, the Council has asked itself 'what if things do not go quite to plan'? The current recession has demonstrated to the Council that the delivery of growth is not always straightforward due to reasons beyond the control of the Local Authority. To demonstrate how the strategy can correct itself if delay occurs to key developments or if neighbourhood plans are not forthcoming or are delayed, further Development Plan Documents may be programmed as a vehicle to deliver growth. These documents may change or strengthen policy and/or provide detailed allocations in response to emerging issues. Further information on other actions that have been considered are set out in the Monitoring Framework in Part 5</u></p> <p><u>Following the period of consultation on Pre-Submission Local Plan there have been several events which fall outside the development strategy which have taken place. For example a number of applications, particularly for residential use have been granted permission. In addition the proposed improvements to the A50 at Uttoxeter have been announced. These improvements will provide benefits to the delivery of site allocations, particularly Land West of Uttoxeter however the improvements are not required to deliver the development strategy. It is likely that there will be additional projects and developments over the plan period and flexibility has been built within the plan to respond to unforeseen circumstances.</u></p>

MM29	94	Strategic Policy 8 Development Outside Settlement Boundaries and justification	<p>Development Outside Settlement Boundaries</p> <p>The countryside within East Staffordshire demonstrates a diversity of character and form with many areas of high intrinsic value. Protecting the countryside needs to be balanced with the recognition that the rural economy, including tourism, is a vital part of the Borough's total economy and that it faces continuing change and pressure over the Plan period. It is central government and Borough Council policy to support appropriate rural enterprise and this is reflected in a suitably flexible policy attitude towards necessary development that is of a suitable scale and designed to fit into its landscape.</p> <p>The Borough Council has signed the Staffordshire Rural Declaration, along with over 40 other organisations, which sets out a commitment to make sure Staffordshire's rural areas reach their full potential by adopting and joined-up, pro-active approach which empowers communities and delivers better outcomes in rural areas. It emphasises that rural areas are an asset; that rural people, communities and businesses should be listened to and not feel overlooked because of their location; and that rural people and businesses should be supported and empowered to create a level playing field – especially where the challenges faced are caused or increased by living or working in a rural location.</p> <p>Priorities for rural Staffordshire were identified by a range of stakeholders at an event held in June 2012, and following this, various stakeholder consultations have taken place to refine these priorities. These priorities include balancing the need to protect and develop rural areas; promoting balanced, inclusive, sustainable and empowered rural communities; and supporting a diverse rural economy. All nine priorities identified will be included within a Staffordshire Rural Strategy, for action by organisations within the county with a vested interest in rural communities, businesses and its environment. The Local Plan will inform the Borough's involvement in helping to deliver the Staffordshire Rural Strategy.</p>

			<p>The Council is anxious to ensure that there is good reason to site new development in the countryside, and will not permit development that would be better situated in an accessible urban location (large-scale retail, for example) or that contributes little to the benefit of the countryside, or where the benefits to the countryside are greatly outweighed by the disbenefits. Appropriate development would be considered to be, but not limited to:</p> <ul style="list-style-type: none"> • extensive outdoor recreational uses that do not involve substantial built development; • development which meets a demonstrated specific local need • infrastructure development where an overriding need for the development to be located in the countryside can be demonstrated; • development necessary to secure a significant improvement to the landscape or the conservation of a feature of acknowledged importance; or • provision for renewable energy generation, of a scale and design appropriate to its location. <p>This policy applies to open countryside and to settlements that do not have a settlement boundary, and should be read in conjunction with Strategic Policies 2 and 24 and Detailed Policies 1, 3, 4, 5 and 6. It applies to all types of development, including housing.</p> <p>The key elements in determining whether or not a development is acceptable in the countryside are:</p> <ul style="list-style-type: none"> • the overall impact on the landscape of buildings and hard features such as yards; • the design of any buildings so they are well integrated into their surroundings with careful choice of materials, landscaping, massing of buildings and attention to local architecture and roofscape design; • recognising the need to maintain land of high agricultural value for food production • impact on local highways, especially where these are narrow lanes; and • proximity to settlements where there are advantages of sustainable linkages, but this should not create unacceptable urban extensions or create the opportunity for unacceptable backfill between the development

MM46	113	Last paragraph and bullet point	<p>The amount of affordable housing to be provided by an individual market housing led site above the is threshold will be governed by viability and the availability of subsidy.</p> <ul style="list-style-type: none"> • The Council's Plan Viability Study indicates how the viable level of affordable housing within subsidy is likely to vary between different types of sites. Given this variation the proportion of affordable housing required on some sites will need to be greater than 25% in order to deliver the average 25% across all sites. • <u>Taking account of agreements already reached before adoption of this Local Plan, the affordable housing still needed equates to over 40% of the housing from which the affordable housing contribution has not yet been agreed. The Council's Plan Viability Study assesses that some sites should be able to deliver 40% affordable housing. 40% is therefore the affordable housing target and the maximum amount of affordable housing which will be required from any market housing led scheme, including both on site and off site provision (see below).</u> • <u>The SHMA considers the Plan Viability Study alongside other evidence to establish what percentages of affordable housing are likely to be viable from different types of site, and these are indicated in the policy.</u> • <u>The Housing Choice SPD sets out the percentage of affordable housing currently expected from sites based on that evidence.</u> • <u>Emerging national policy guidance requires a mechanism to allow an applicant to demonstrate that planning obligations would make a development unviable and for obligations to be adjusted accordingly.</u> <p>Hence the amount of affordable housing required from an individual site will be determined taking into account the financial viability of the scheme given other obligations and/or CIL payment required by the Council. <u>The amount of affordable housing which will in practice be secured under the Local Plan without grant is therefore uncertain.
